Contents Volume 68

Vol. 68, No. 1

Preface
R.W. Grubbström and H.H. Hinterhuber ix
Heuristic methods for cost-oriented assembly line balancing: A survey
M. Amen 1
Service systLem structure
J.A. Buzacott 15
Multi-agent systems in production planning and control: An application to the scheduling of mixed-model assembly lines
M. Caridi and A. Sianesi 29
Production variability and shop configuration: An experimental analysis
A. D'Angelo, M. Gastaldi and N. Levialdi 43
A performance comparison of pull type control mechanisms for multi-stage manufacturing
F. Karaesmen and Y. Dallery 59
Modelling input–output workload control for dynamic capacity planning in production planning systems
B.G. Kingsman 73
Greedy heuristic algorithms for manpower shift planning
A.G. Lagodimos and V. Leopoulos 95
The influence of shop characteristics on workload control
B. Oosterman, M. Land and G. Gaalman 107
Diary of Events 121

Vol. 68, No. 2

Modelling rescheduling activities in a multi-period production–inventory system
R.W. Grubbström and O. Tang 123
Identification of aggregate resource and job set characteristics for predicting job set makespan in batch process industries
W.H.M. Raaymakers and J.C. Fransoo 137
Performance guarantee of two simple priority rules for production scheduling
G. Schmidt 151
A practical decomposition approach for a chemical substance scheduling problem
P. Van Bael and M. Rijckaert 161
The impact of material coordination concepts on planning stability in supply chains
K. van Donselaar, J. van den Nieuwenhof and J. Visschers 169
Parallel machine scheduling with batch delivery costs
G. Wang and T.C.E. Cheng 177
Application of multiagent systems in project management
Y. Yan, T. Kuphal and J. Bode 185

0925-5273/00/$ - see front matter © 2000 Elsevier Science B.V. All rights reserved.

A heuristic solution concept for a generalized machine sequencing problem with an application to radiator manufacturing
G. Zäpfel and M. Wasner 199
Diary of Events 215

Vol. 68, No. 3

Continuous review inventory models where random lead time depends on lot size and reserved capacity
M. Çakanyildirim, J.H. Bookbinder and Y. Gerchak 217
Capacity allocation and outsourcing in a process industry
T.G. de Kok 229
A genetic algorithm to solve the general multi-level lot-sizing problem with time-varying costs
N. Dellaert, J. Jeunet and N. Jonard 241
Genetic algorithm optimisation of a class of inventory control systems
S.M. Disney, M.M. Naim and D.R. Towill 259
The (*r, Q*) control of a periodic-review inventory system with continuous demand and lost sales
S.G. Johansen and R.M. Hill 279
Integration of assembly and fabrication for make-to-order production
R. Kolisch 287
The (*R, Q*) inventory policy subject to a compound Poisson demand pattern
P. Matheus and L. Gelders 307
An integrated Lagrangean relaxation-simulated annealing approach to the multi-level multi-item capacitated lot sizing problem
L. Özdamar and G. Barbarosoglu 319
Diary of Events 333
Author Index to Volume 68 335
